

For Entertainer's

Our Home Theater and Multi-Room Music Systems can make your home the envy of all your friends and family.

Whether home theater means a cozy corner of your living room or a screening room with theater seating, Our products make it easy to design a solution that fits you and your home perfectly. The possibilities are endless — and more affordable than you ever imagined.

USE JUST ONE REMOTE TO TURN ON YOUR ENTIRE HOME THEATER SYSTEM

If it usually takes you at least 4 remotes and a couple of references to the manuals or your 8-year-old to turn on your home theater, you'll love NEXGEN Controls. One-touch can turn on the TV or projector, the DVD changer, satellite, stereo system, and even lower a projector screen, sets everything up for watching a movie, and gives you a library of cover art so you can easily select the movie you want to see. Your one-touch theater setting can also lower the lights and shades in the room and raise or lower the temperature to create the perfect ambiance.

Having a party? Broadcast your favorite tunes in the living room, kitchen and patio for the perfect party atmosphere.

Hosting the Big Game Party?

Don't miss a minute of the action, play the audio from the game out on the patio while you man the bbq.

EASILY ACCESS ALL OF YOUR MUSIC SOURCES.

Like most people, you probably have music everywhere. Multiple iPods throughout the house; hard drives, PCs or NAS drives with your digital music collections; stereos with your favorite local stations; and maybe even streaming music services like XM Sirius, Rhapsody or Pandora. It can be almost impossible to find that one, favorite song or figure out how to make a playlist using songs from different sources. NEXGEN Controls makes it easy to access all of your music sources from one, central interface – and even lets you create playlists mixing any or all of the sources.
