### MONITORING & MAINTENANCE

All Monitoring and Maintenance programs are optional.

#### INSTALLED BY US

All of the systems that we install qualify for all options of our Monitoring and Maintenance programs.

#### INSTALLED BY OTHERS

All major brands of security systems qualify for our Monitoring and Maintenance programs. If you are currently being monitored by another company, we will not charge you to take over your monitoring services and we will test and certify your security system FREE OF CHARGE.\*

**ULC Alarm Monitoring** - Our alarm monitoring service is done through a network of five monitoring centers that are linked together. Each centre can act as a backup to another in the event of a disaster (ice storm, flooding, major power outages, etc.) guaranteeing uninterrupted service at all times. Certified by Underwriter's Laboratories of Canada, ensures that our monitoring centers adhere to the highest industry standards guaranteeing that no matter what the circumstance our monitoring centers are always standing by to ensure your protection 24 hours a day.

**Lifetime Warranty** - All replacement parts and labour charges are covered for any equipment-related problems. Anything beyond our control (e.g. vandalism, willful or accidental damage, power surges or acts of nature) would be chargeable. System back-up batteries are covered, wireless device batteries are not included.

**Annual Inspection** - An inspection of your alarm system's components and connections to ensure proper operation of your security system. We will also make certain that the integrity of the original system design has not changed due to any remodeling or redecorating in your home.

**Annual Testing and Certification** - Your security system will be tested and certified to ensure that all devices, keypads and control panels are functioning within manufacturers specifications. Your security system's communication with our monitoring station will also be tested and certified ensuring that all zones and devices transmit properly to the monitoring station.
